

[DATE]

Dear Customer:

Every day, PECO is delivering innovation and advancing smart energy to provide safe, reliable, affordable, and clean energy and energy services for our customers. As part of our work, we will be upgrading and installing new equipment to enhance the local electric distribution system in your area.

This project is part of PECO's System 2020 plan to invest an additional \$274 million during the next five years to install advanced equipment and reinforce the electric system, making it more weather resistant and less vulnerable to storm damage. This investment is in addition to \$300 million in ongoing system work completed each year, including replacing and upgrading equipment.

About the Project:

- More than \$1.5 million will be invested to enhance the local electric distribution system for you and your neighbors in Pennsbury and Kennett Townships.
- We will be upgrading and installing new equipment in your area, including new utility poles, new aerial wire and new devices, known as reclosers, to reduce the number of customers affected when outages do occur by automatically rerouting power.
- This project also will include additional tree trimming and tree removals to reduce the number of outages caused by trees and other vegetation.
- The majority of this work will occur along Pocopson Road and Parkersville Road.
- The project is expected to begin in January 2019 and complete by the end of July 2019; work will occur from 7 a.m. to 4 p.m., Monday through Friday.
- Work will be performed by qualified PECO contractors.

Crews may need to temporarily interrupt electric service to safely complete some of this work. We will work with local residents to ensure they are informed in advance of our activities and any planned outages. In addition, much of this work will be completed on the roadway. We will work closely with local officials to minimize the impact on customers as much as possible.

We are dedicated to keeping you informed about our work, listening to your input and modifying plans based on your feedback when possible. If you have any questions about this work during construction, please contact Dan Abbonizio at 484-685-7498 or daniel.abbonizio@exeloncorp.com.

Sincerely,

James Garvey
Director, Regional Electrical Operations, PECO
